INTELLIGENT SOLUTIONS FOR DAMAGE CAPTURING

Vitalii Istushkin
Business Development Executive
Co-Founder

The Problem

More than half of car inspections measurements in Europe are done manually

SOFT EDGE

HailMaster Mobile app

Solution for quick and precise automatic hail damage detection and precise measuring damage area using AI and ML on mobile device.

★ Digitalization of the all data in damage capturing process
★ Brings transparency in hail damage assessment process
★ Saves lot of time
★ Basic functionality available for Free in AppStore

SOFT EDGE

HailMaster Webservice

Integratable solution for quick and precise automatic hail damage detection and precise measuring damage area using AI.

★ Easily integratable solution in to existing business process or mobile applications.
★ Brings transparency in hail damage assessment process
★ Model can be improved and retrained on regular basis
★ Webservice can be hosted in the cloud and also on the client side.

SOFT EDGE

Recognition Process

Dent mirrors already on the market since long time

iOS Application can be installed on all Apple mobile devices with iOS 11 and above. Webservice can be hosted in cloud and also in internal system ecosystem.

Actual recognition process takes about 15sec per part, whole car damage can be captured in about 10 minutes
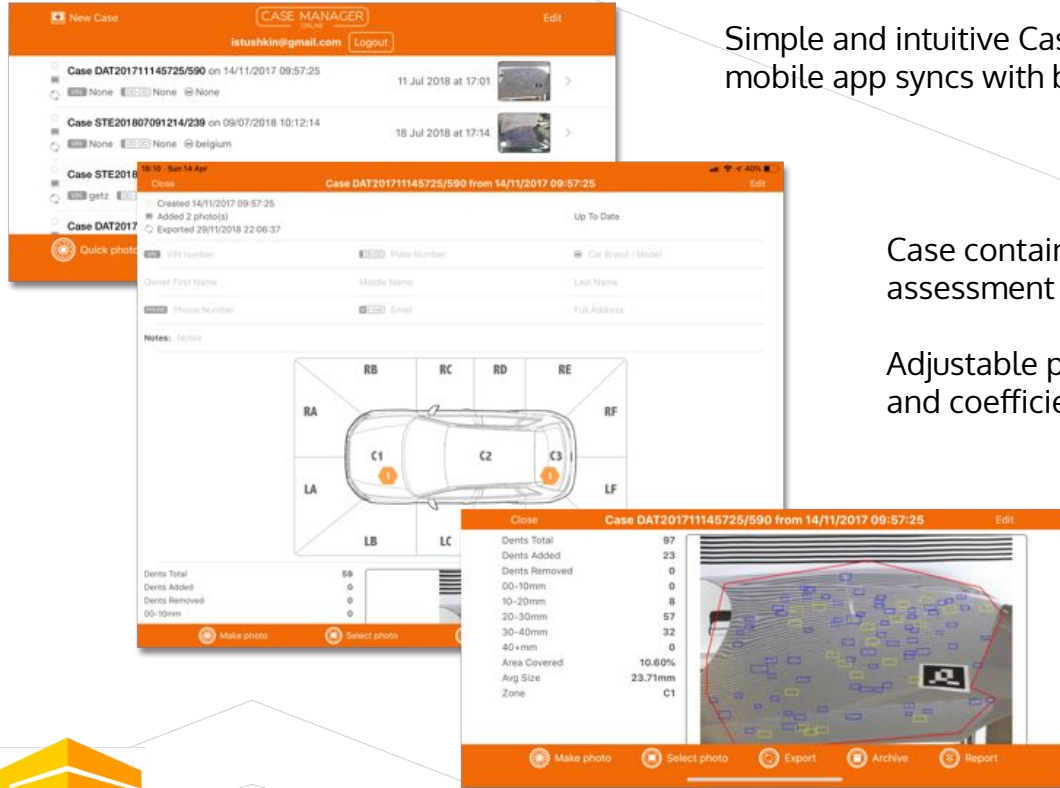

SOFT EDGE

Intuitive UX/UI

Simple and intuitive Case management. Fully functional Offline mode, mobile app syncs with backend when connection to Online available.
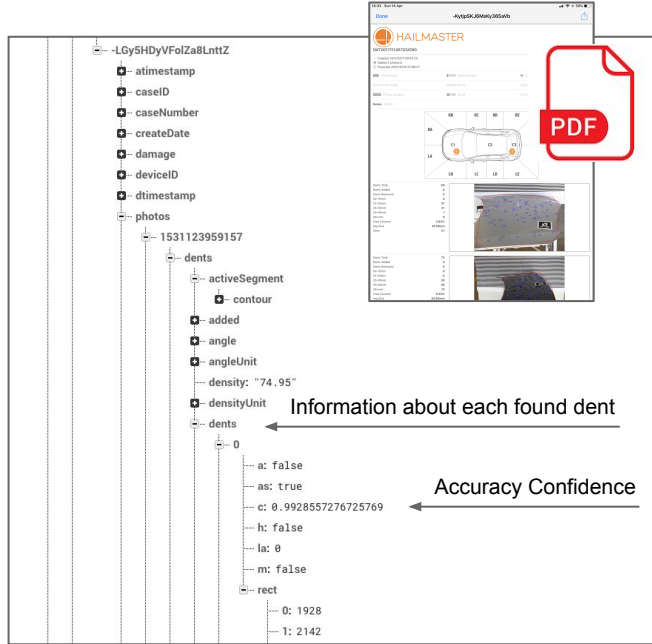

Case contains all required information to prepare assessment and estimate repair.

Adjustable pricing model and ability to add additional costs and coefficients.

Each recognized photo shows results on the left. Photo can be reviewed, reprocessed in any moment.

SOFT EDGE

Data export and Integration

Information about each found dent

Accuracy Confidence

- All data from cases syncs with Backend Database
- In the case Application collects full information about each dent found on each processed photo
- Report in PDF format can be quickly generated and sent
- All information can be easily exported and mapped with other market data standards
- Application can be quickly localized lo local market language and needs.
- Application can be configured to extend existing company damage capturing process.
